This permit is issued subject to all prior rights on the source. Reference is hereby made to agreement between the applicant herein and Carl Ray, dated February 7, 1922. A substantial headgate and measuring device must be installed as set forth in said agreement. The amount of 0.9759 cubic foot of water per second allowed in this permit is required to be measured at the point of diversion, it being estimated that due to seepage and evaporation losses such allowance of water measured at said point of diversion will not amount to more than the statutory allowance of 0.4 cubic foot of water per second for the 40 acres of land proposed to be irrigated at the point where the main ditch enters said land. The State reserves the right to regulate the use of the water herein granted at any and all times.
